Block Bank's mission is to revolutionize the banking industry to make credits more available and affordable even to the unbanked or under banked countries. Block Bank will serve as a crypto funded decentralized funding platform. Designed to serve as a funding source focused on meeting human needs.

The Global funding problem

The contrast in borrowing rates between developing and developed economies in some cases is 20%.

In some countries borrowing is so expensive, the borrower has to pay enough money to pay the whole loan in 5 years just in interest payments, Block bank will provide low cost funding to commercial entities and governments throughout the world, bridging the access gap for low cost funding products to developing economies. This will create an environment where developing economies can build their infrastructure and businesses can get access to low cost financing

Solution

The provision of secured financing with appropriate risk controls will provide emerging economies the finance they need to develop. With a decentralized online platform the funds will be available easily anywhere in the world.

Crypto Banks will become the basis of a new decentralized economy due to the expanding payment possibilities, minimum taxes, improved speed and enhanced security.

We believe banks tomorrow will look totally different from banks today.

Block Bank is one of the first worldwide crypto banks who will provide services to meet the global need for decentralized commercial funding.
